3. (Cancelled)

4. (Cancelled)

5. (Previously presented) Arrangement in accordance with Claim 1, wherein the handle exhibits double-articulated vertical legs.

6. (Previously presented) Arrangement in accordance with Claim 1, wherein the handle is detachably installed on the bucket.

7-9 (Cancelled)

10. (Previously presented) Arrangement in accordance with Claim 1, wherein the two short sides of the bucket are of identical length viewed around the periphery of the bucket, and in that all sides of the bucket are flat.

11. (Previously presented) Arrangement in accordance with claim 1, wherein all sides of the bucket are flat.

12. (Currently amended) Arrangement in accordance with claim 31, wherein the shape of the handle is adapted to the peripheral form of the bucket between the pivot bearings.

13. (Currently amended) Arrangement in accordance with claim 31, wherein all sides of the bucket are flat.

14. (Currently amended) Arrangement in accordance with claim 41, wherein all sides of the bucket are flat.

15. (Previously presented) Arrangement in accordance with claim 5, wherein all sides of the bucket are flat.

16. (Previously presented) Arrangement in accordance with claim 6, wherein all sides of the bucket are flat.

17. (Cancelled)

18. (Currently amended) Arrangement in accordance with claim 31 wherein the sides of the bucket are essentially flat and are inclined slightly outwards from the bottom of the bucket to be stackable.

19. (Currently amended) Arrangement in accordance with claim 41 wherein the sides of the bucket are essentially flat and are inclined slightly outwards from the bottom of the bucket to be stackable.

20. (Previously presented) Arrangement in accordance with claim 5 wherein the sides of the bucket are essentially flat and are inclined slightly outwards from the bottom of the bucket to be stackable.

21. (Previously presented) Arrangement in accordance with claim 6 wherein the sides of the bucket are essentially flat and are inclined slightly outwards from the bottom of the bucket to be stackable.

22. (Previously presented) Arrangement in accordance with claim 10 wherein the sides are inclined slightly outwards from the bottom of the bucket to be stackable.
